

Plastic Sheet Extrusion Line

Plastic Sheet Extrusion Line

Sunwell Global is a world leader in the manufacture of plastic sheet extrusion systems. We offer complete turnkey systems for mono-layer, multi-layer and barrier layer sheet extrusion requirements. The systems can be configured to run sheet off-line with winding or shearing equipment, in-line with a thermoformer for high volume parts. We offer processing expertise in polypropylene, PET, polystyrene and other polymers. Our typical production equipment extrusion rates begin at 200 Kg/Hr and go up to 4000 Kg/Hr.

The extruders are normally fitted with filtering devices, melt pumps, static mixers, co-extrusion manifolds (where applicable) and state of the art manifold flat dies.

The sheet systems typically range in width from 750 mm to 1700 mm wide. The roll diameters are sized to provide ample cooling based on the process requirements.

Sunwell also offers a complete line of auxiliary equipment for sheet production including: microprocessor process control, gravimetric blending and feeding equipment, coating and laminating stations, sheet gauging systems with automatic profile control, and winding equipment.

We invite you to join the most efficient and profitable companies in the world that call Sunwell Global their partner in sheet production equipment.

PARTNERS FOR MAXIMUM PROFITABILITY

Plastic Sheet Extrusion Lines

Material	PS; PP; PET; PLA and many other rigid sheet Polymers
Layers	Single extrusion mono layer or Co-extrusion multi layers
Production	Sheet Cut; Reel Wind; In-line with Thermoformer
Thickness	0.2 ~ 3mm
Width	500 ~ 1,700mm
Screw Dia.	50;65; 75;90; 100;120;130;150;170;180 &200mm
Throughput	200 ~ 2,500 kg/hr
Line Speed	Up to 100M/Min.
Roller Stacker	Vertical; 45 Incline; J type
Roller Dia.	300; 350; 400; 450; 500; 600; 750; 900mm
Winder	Fix shaft; Cantilevered shaft; Jumbo Roll & Turret
Drive System	SIEMENS AC drive with FLENDER gearbox or Equivalent

Sunwell Taiwan

Add: No. 6-3 Taluen Road, Tatsun Hsiang,
